EDUCATION

Stanford University

Bachelor of Science in Mathematics & CS

GPA: 4.08/4.0 | Relevant Coursework: CS 129, CS 106B, Math 51/52/53, MSE 472

Clubs: Debate Society; SIRI Research Fellow; ASES Summit & Alumni Team; Blyth Analyst

Palo Alto, CA

Sep. 2025 – June 2029

Chinese International School

IB Diploma: 44/45 with 4 HLs (CS, Math, Physics, Economics); ACT: 36/36

Hong Kong

2021 – 2025

EXPERIENCE

AI Engineer

Alpha AI Engineering

June 2026 – Present

Austin, TX

- Built a prompt-to-3D-LUT small-language-model pipeline spanning provenance-aware ingestion, ΔE_{00} quality gates, leakage-safe splits, VQ tokenization, constrained decoding, and statistical evaluation.
- Rebuilt Anki into Ankountant, a cross-platform CPA study app with deadline-aware scheduling and calibrated readiness; shipped 161 source-grounded cards through a 12-stage RAG, leakage, and deduplication pipeline.
- Developed Ergo, an interactive math platform with 66 lessons across 10 concepts, exact-rational probability engines, Firebase progress, and voice mock interviews over the OpenAI Realtime API.

Undergraduate Researcher – Medical AI

Harvard Medical School, Rajpurkar Lab

May 2026 – Present

Boston, MA

- Developing the Clinical Environment Simulator, a FastAPI/Next.js emergency-department world model for benchmarking human and LLM decisions across concurrent patients and finite clinical resources.
- Implemented and integration-tested multiplayer patient reassignment that migrates queued clinical actions across clinician seats, preserving action ownership through handoffs.

Intern

Wisdom Family Office

July 2025 – August 2025

Hong Kong

- Led a four-person team building an n8n/RAG workflow for front-office research using Python, C++, and ChatGPT, Gemini, Perplexity, and Cohere APIs.
- Proposed a US\$280M cross-border wealth and succession plan to BNP Paribas Asia leadership, integrating global allocation, a Singapore 13U structure, and philanthropy.
- Supported research for US\$7B AUM by coordinating with 30+ private-bank and 10+ investment-bank partners.

Machine Learning Engineer Intern

HK Quantum AI Lab Limited

June 2024 – August 2024

Hong Kong

- Implemented retrieval-augmented generation with Hugging Face and LangChain to predict precursor chemicals for target battery electrolytes.
- Built a scraper that processed 3,500 battery-electrolyte manufacturing patents from Google Patents.

PROJECTS & RESEARCH

ML in Genomics and Health | *Python, PyTorch, TensorFlow, Keras*

July 2023

- First-authored, with MIT Professor Manolis Kellis, “Investigating Deep Learning Models for Brain Tumour Classification from MRI Images.”
- Implemented three deep-learning models on 40,000+ images, achieving 98.90% classification accuracy.

HONORS & AWARDS

- Best Designed Web App, CalHacks 12.0 (2,000+ attendees) Oct. 2025
- Top 10% (37/380 teams), AI 911 Operator Hackathon (15K+ applicants) Oct. 2025
- Grand Champion, 4th Best Speaker @ Keio IV Feb. 2025
- Team Hong Kong @ WIDPSC – Global Top 12 in Interp Reading & Top 24 in Debate Apr. 2024

TECHNICAL SKILLS

Languages: Python, C++, Java, TypeScript/JavaScript, SQL, HTML/CSS

Frameworks & Tools: React, Next.js, FastAPI, Firebase, Redis, Git, Google Cloud Platform, Azure

ML & Data: PyTorch, TensorFlow, Hugging Face, LangChain, Pandas, NumPy, scikit-learn, n8n
